

FITTING INSTRUCTIONS – JAGUAR

Lower wishbone rear bush. (31S)

Fit the bush with the large flange to the outside of the wishbone. When reassembling the new washer supplied fits to the outside of the wishbone against the bolt head, and you should re-use the smaller washer, which sits on the inside of the wishbone against the small flange.

Lower wishbone front bush. (31Q)

Fit the bush with the large flange to the inside of the wishbone. Use the large washer to reassemble fitted to the inside of the wishbone against the large flange.

Upper wishbone bush. (31Y)

Fit the bushes with the large flange to the outside of the wishbone in both cases. Two retaining washers are provided to be fitted one each side of the bush during re-assembly
